

Name: _____

Date: _____

Addition By Fraction - Same Denominator

$$1) \quad \frac{6}{8} + \frac{5}{8} =$$

$$2) \quad \frac{8}{6} + \frac{1}{6} =$$

$$3) \quad \frac{2}{8} + \frac{4}{8} =$$

$$4) \quad \frac{2}{4} + \frac{7}{4} =$$

$$5) \quad \frac{3}{9} + \frac{7}{9} =$$

$$6) \quad \frac{6}{1} + \frac{9}{1} =$$

$$7) \quad \frac{6}{3} + \frac{1}{3} =$$

$$8) \quad \frac{2}{2} + \frac{4}{2} =$$

Addition By Fraction - Same Denominator- Solution

$$1) \quad \frac{6}{8} + \frac{5}{8} = \frac{6+5}{8} = \frac{11}{8} = \frac{11}{8}$$

$$2) \quad \frac{8}{6} + \frac{1}{6} = \frac{8+1}{6} = \frac{9}{6} = \frac{3}{2}$$

$$3) \quad \frac{2}{8} + \frac{4}{8} = \frac{2+4}{8} = \frac{6}{8} = \frac{3}{4}$$

$$4) \quad \frac{2}{4} + \frac{7}{4} = \frac{2+7}{4} = \frac{9}{4} = \frac{9}{4}$$

$$5) \quad \frac{3}{9} + \frac{7}{9} = \frac{3+7}{9} = \frac{10}{9} = \frac{10}{9}$$

$$6) \quad \frac{6}{1} + \frac{9}{1} = \frac{6+9}{1} = \frac{15}{1} = \frac{15}{1}$$

$$7) \quad \frac{6}{3} + \frac{1}{3} = \frac{6+1}{3} = \frac{7}{3} = \frac{7}{3}$$

$$8) \quad \frac{2}{2} + \frac{4}{2} = \frac{2+4}{2} = \frac{6}{2} = \frac{3}{1}$$
