

Name: _____

Date: _____

Subtraction By Fraction - Same Denominator

$$1) \quad \frac{25}{14} - \frac{5}{14} =$$

$$2) \quad \frac{23}{25} - \frac{20}{25} =$$

$$3) \quad \frac{12}{12} - \frac{2}{12} =$$

$$4) \quad \frac{22}{19} - \frac{21}{19} =$$

$$5) \quad \frac{16}{20} - \frac{1}{20} =$$

$$6) \quad \frac{18}{21} - \frac{9}{21} =$$

$$7) \quad \frac{22}{20} - \frac{20}{20} =$$

$$8) \quad \frac{23}{22} - \frac{6}{22} =$$

Subtraction By Fraction - Same Denominator- Solution

$$1) \quad \frac{25}{14} - \frac{5}{14} = \frac{25-5}{14} = \frac{20}{14} = \frac{10}{7}$$

$$2) \quad \frac{23}{25} - \frac{20}{25} = \frac{23-20}{25} = \frac{3}{25} = \frac{3}{25}$$

$$3) \quad \frac{12}{12} - \frac{2}{12} = \frac{12-2}{12} = \frac{10}{12} = \frac{5}{6}$$

$$4) \quad \frac{22}{19} - \frac{21}{19} = \frac{22-21}{19} = \frac{1}{19} = \frac{1}{19}$$

$$5) \quad \frac{16}{20} - \frac{1}{20} = \frac{16-1}{20} = \frac{15}{20} = \frac{3}{4}$$

$$6) \quad \frac{18}{21} - \frac{9}{21} = \frac{18-9}{21} = \frac{9}{21} = \frac{3}{7}$$

$$7) \quad \frac{22}{20} - \frac{20}{20} = \frac{22-20}{20} = \frac{2}{20} = \frac{1}{10}$$

$$8) \quad \frac{23}{22} - \frac{6}{22} = \frac{23-6}{22} = \frac{17}{22} = \frac{17}{22}$$
